

AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all prior versions of claims in the application.

1. (Original): A curable composition comprising
 - (A) 100 parts by weight of a reactive silicon group-containing polyoxypropylene polymer,
 - (B) from 0.1 to 20 parts by weight of a silane coupling agent,
 - (C) from 0.1 to 80 parts by weight of an epoxy group-containing compound,
 - (D) from 0.1 to 60 parts by weight of a tertiary amine, and
 - (E) from 0.1 to 30 parts by weight of a primary or secondary amine having a melting point of 20°C or more.

2. (Original): A two-component curable composition comprising agent A comprising
 - (A) x parts by weight of a reactive silicon group-containing polyoxypropylene polymer,
 - (B) from 0.1 to 20 parts by weight of a silane coupling agent,
 - (D) from 0.1 to 60 parts by weight of a tertiary amine, and
 - (E) from 0.1 to 30 parts by weight of a primary or secondary amine having a melting point of 20°C or more (provided $0 < x \leq 100$), and agent B comprising
 - (A) 100-x parts by weight of the reactive silicon group-containing polyoxypropylene polymer,
 - (C) from 0.1 to 80 parts by weight of an epoxy group-containing compound, and
 - (F) from 0.1 to 5 parts by weight of water.

3. (Original): The curable composition as claimed in claim 1 or 2, wherein the viscosity of the composition is at least 50 Pa·s and at most 200 Pa·s at 23°C, and the structural viscosity index thereof is at least 4.0 and at most 10.

4. (Currently amended): The curable composition as claimed in ~~any of claims 1 to 3~~ claim 1 or 2, which further comprises
(G) from 50 to 300 parts by weight of an inorganic filler.

5. (Currently amended): The curable composition as claimed in ~~any of claims 1 to 4~~ claim 1 or 2, wherein component (E) is a primary amine.

6. (Currently amended): A coating material comprising the curable composition as claimed in ~~any of claims 1 to 5~~ claim 1 or 2.
